SERIES 390
Release software version 1.0.5 and launch of the density kit

HIGHLIGHTS OF THE RELEASE 1.0.5

- Density determination application

  free for HF and HA models

  optional for HE and HM models (free evaluation); 390-8609

  - guided workflow with animated step by step
    instructions for simple and user friendly operation
  - supports solid and porous materials as well as liquids
  - supports density determination with the density kit
  - supports density determination „below balance"
  - fully integrated context help
  - integrated installation instructions for the „density
    kit" and „below balance"
  - allows reliable and error-free work

- After calibration a report is automatically generated

- After adjustment and levelling return directly to the previous
  app via home-button

LAUNCH OF THE DENSITY KIT SERIES 390

For easy handling in density determination, we recommend the density kit.
It is fully supported by the density application.

ITEM NUMBERS

350-8719: Density kit

350-8720: Density kit solids only (without glass body and hook)

* Glass body for density determination of liquids
